

## **LAB 10 Question**

Using RDD and FlatMap count how many times each word appears in a file and write out a list of words whose count is strictly greater than 4 using Spark.

Commands:

```
val textFile = sc.textFile("/home/bhoom/Desktop/wc.txt")

val counts = textFile.flatMap(line => line.split(" ")).map(word =>
(word,1)).reduceByKey(_ + _)

import scala.collection.immutable.ListMap

val sorted=ListMap(counts.collect.sortWith(_._2 > _._2):_*)// sort in descending
order based on values

println(sorted)

for((k,v)<-sorted) {
  if(v>4) {
    print(k+",")
    print(v)
    println()
  }
}
```
